Top 10 Seller Vs Rest

● Rest of Sellers Share ● Seller Revenue Share(Top 10)

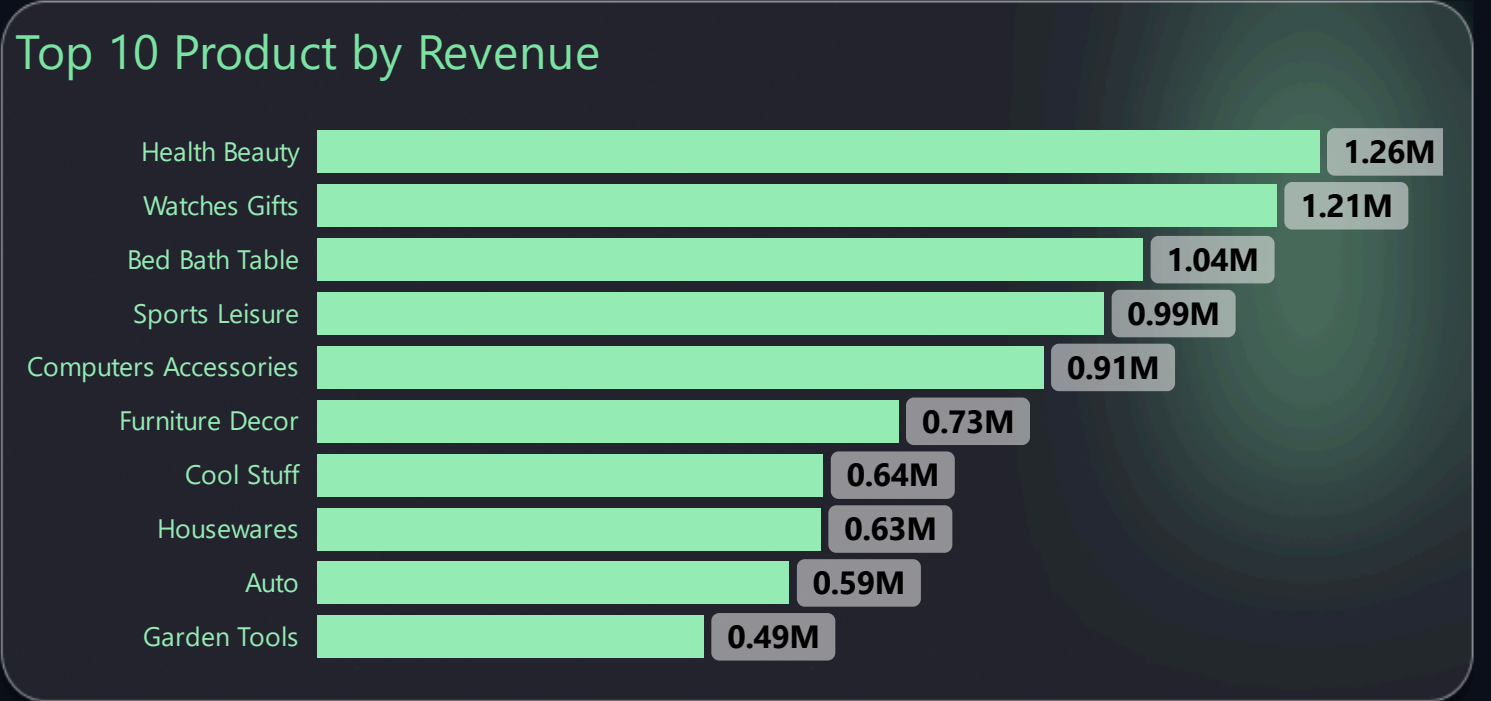

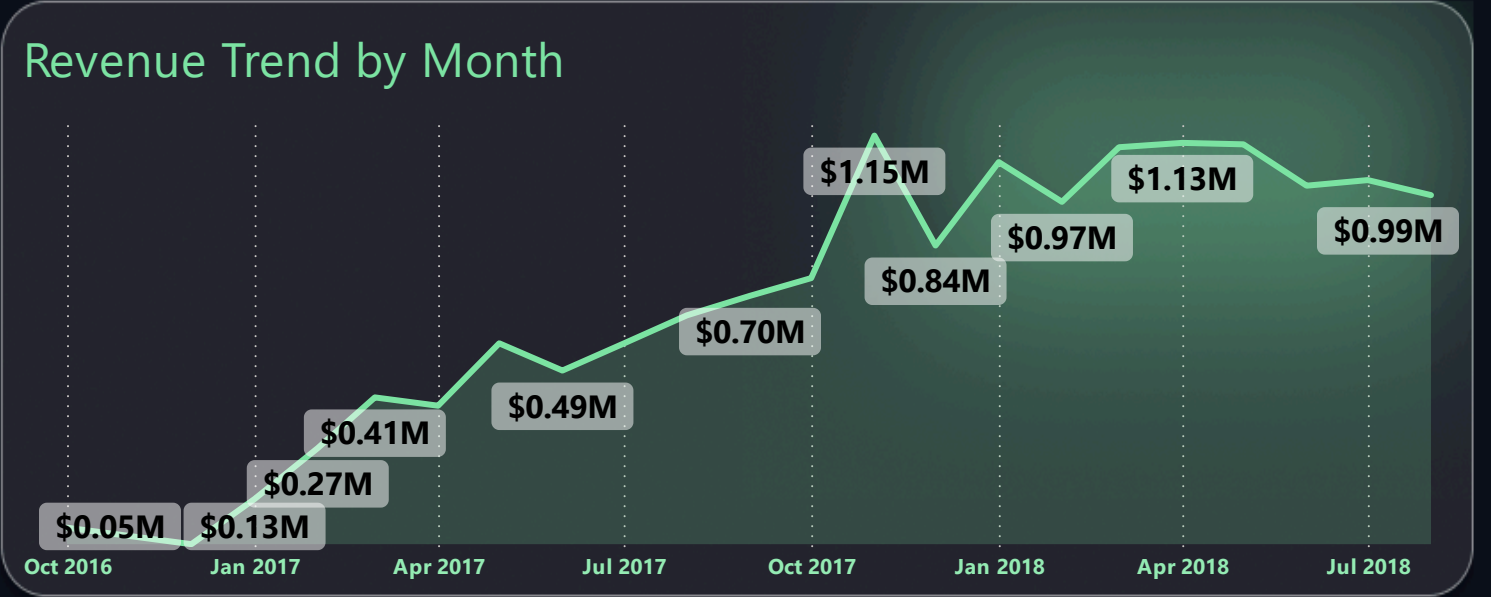

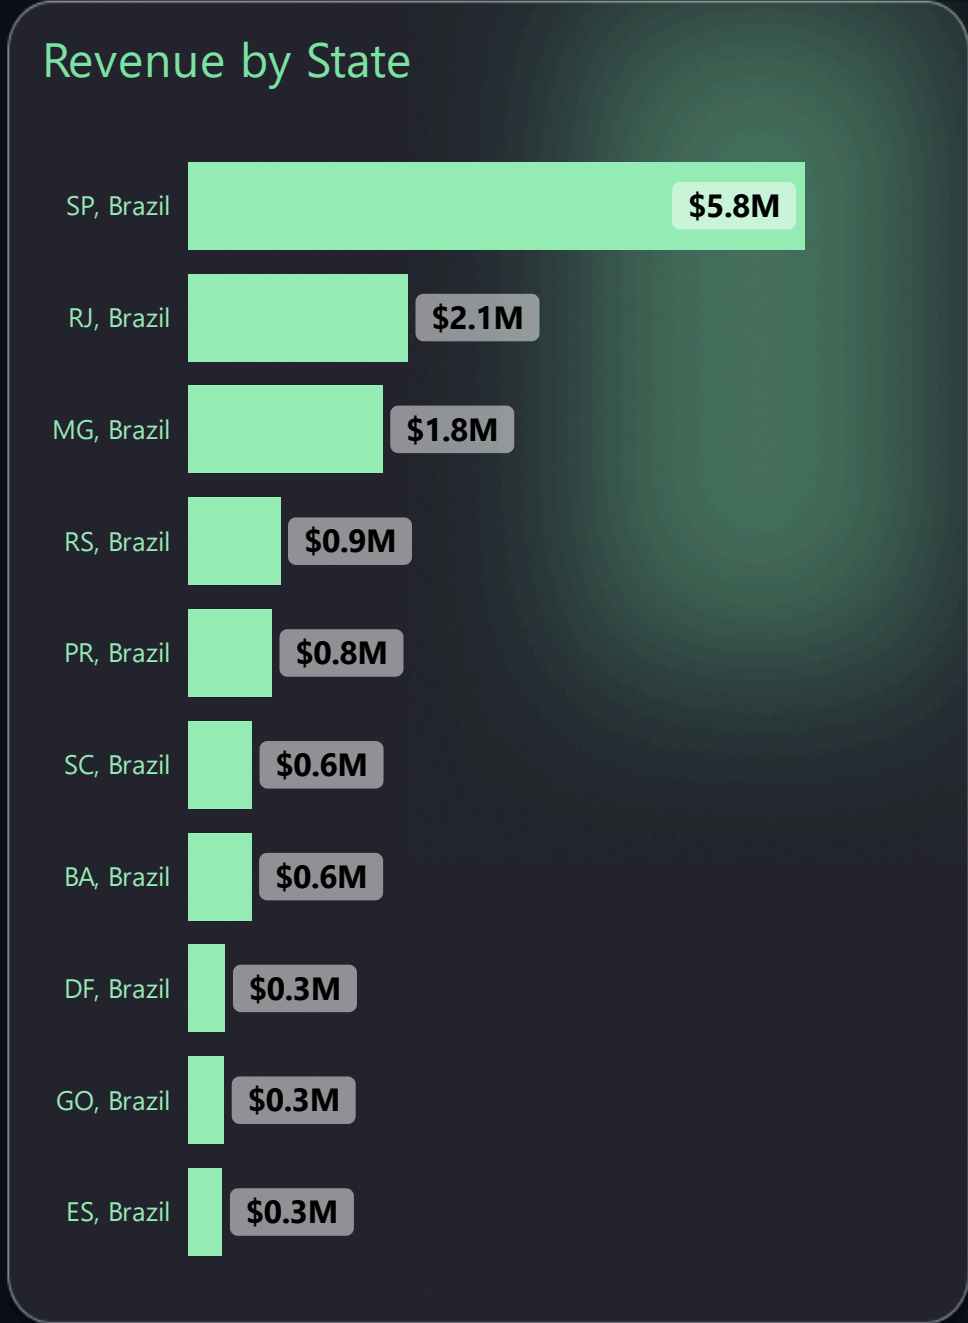

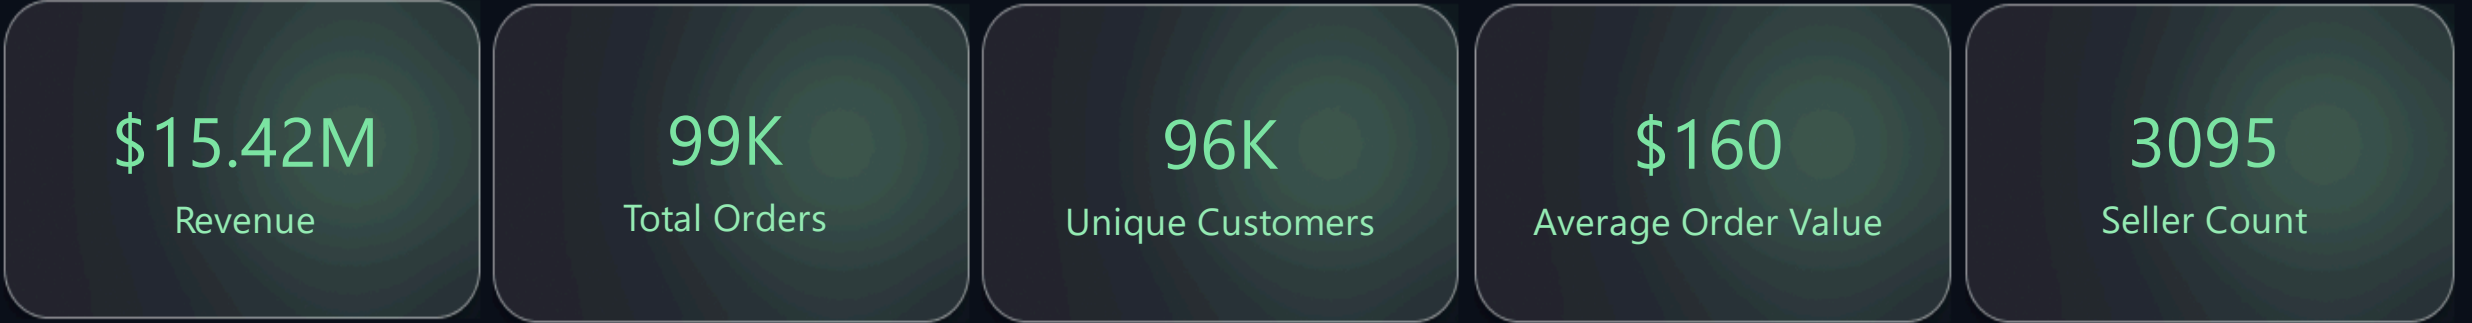

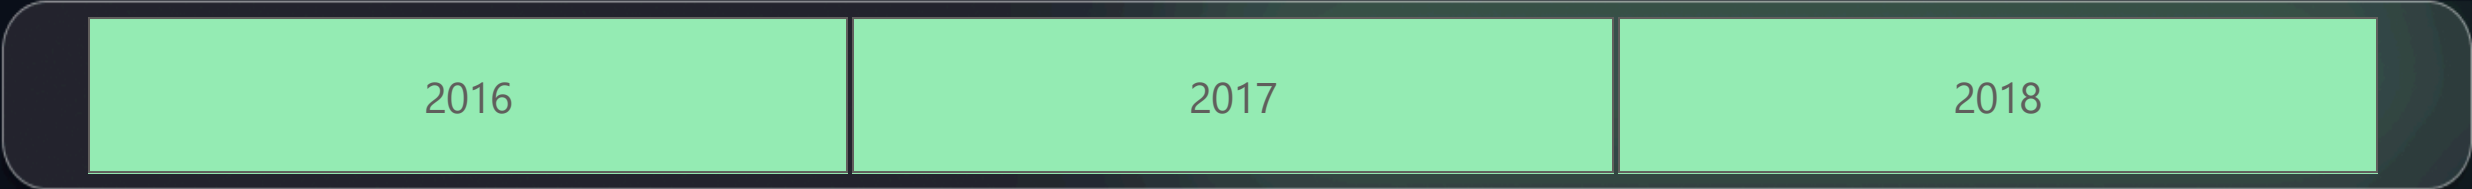

⚠ Executive Commentary:

Seller Base: Well-diversified — the top 10 sellers generate only 13.16% of total platform revenue, indicating no dangerous dependency on a small group of sellers.

Payment Behavior: Credit Card dominates both transaction volume (~72%) and revenue share (~78%), with the highest average order value (\$163). Debit Card and Voucher usage is comparatively rare, so their lower averages carry less statistical weight.

Geographic Concentration: São Paulo generates 37.4% of total national revenue — more than the next two states (Rio de Janeiro and Minas Gerais) combined. Expected given SP's size and economic weight, but it does mean performance is disproportionately tied to one region.
